Subject: Microsoft Settlement

I think the justice department should take the settlement and STOP WAISTING TAX PAYERS HARD EARNED MONEY. It seems that Microsoft is being unfairly attacked by the justice department. This is ridiculous. Take the money and leave Microsoft alone. It seems to me that the Justice Department is just trying to get money from Microsoft because Bill Gates is so incredibly wealthy. Why doesn't the Justice Department go after other companies for monopolizing industries?? I'm tired of hearing about this entire situation. Microsoft is not a government run company. It's a private company. Leave them alone already!! The justice department looks like the bad guy here. If people have a problem with buying Microsoft Windows because it has internet explorer on there and they can't take it off then I say to them DON'T BUY IT! Netscape is readily available. Netscape is just whining because they want a piece of the pie too. Well they should get out there and work for it just like Microsoft. To Netscape I say QUIT BEING BABIES..DO YOU WANT SOME CHEESE WITH YOUR WINE? Let's get over it already!! Take what money you are being offered from Microsoft because I think you are lucky you're getting anything. I think they shouldn't give you a dime of their HARD EARNED money. The justice department is wasting our HARD EARNED money on this frivolous case. This should have never come this far. It's out of control. Quit while you're ahead.
